GE01474580

My name is Ioane Dolidze, live in Tbilisi, Georgia and am currently a sophomore (2nd) year medical student at Tbilisi State Medical University (TSMU), pursuing the United States Medical Doctor (USMD) program conducted in English. My availability is strictly limited to the evening and nighttime hours, from 6 PM to 8 AM, as my commitments such as exams, seminars, labs, and lectures are predominantly scheduled in the mornings. It's important to note that I belong to the 2028 batch.

In terms of the job description, I am particularly interested in roles that will challenge and engage my exceptional mental capabilities beyond simple data collection or customer communication tasks. While I am open to performing these tasks if required, my goal is to contribute meaningfully while making the most of the unique skills and capabilities, further refining them and gaining more insight on the world and myself!
