Vacancy details

We're looking for a WordPress developer with good understanding of front-end technologies, including HTML 5, CSS3, and Javascript/jQuery. As we make WordPress products like themes and plugins, the candidate must be very good in PHP and WordPress standards.

Key requirements:

More than 2 years of web programming experience

knowledge of PHP

Knowledge of WordPress theme development

Knowledge of WordPress plugin development

Experience working on PSD to HTML or other front-end projects

The projects are in English, so the candidate should be able to communicate in English.
