## everyone needs one chance

GE01423904

I am 16 years old school student, many of you might think that I am not capable of teaching a kid, but my experience and characteristics gives me right to say I am knowledgeable in this language. I am capable to tutor a beginner and give a child fundamental understanding in this language. To say the least, from my point of view children don't get proper education. lot of times they have hatred towards this subject in schools. this is caused by teachers who have no actual intelligence and have no growth in relationships with students. but I want to convert this life style for kids especially for beginners and make them love this language.
